

Retrofit Emission Solutions for On-Road Diesel-Powered Vehicles

Donaldson was the first to introduce tailpipe and crankcase retrofit solutions in support of the U.S. EPA & California ARB voluntary diesel retrofit programs.

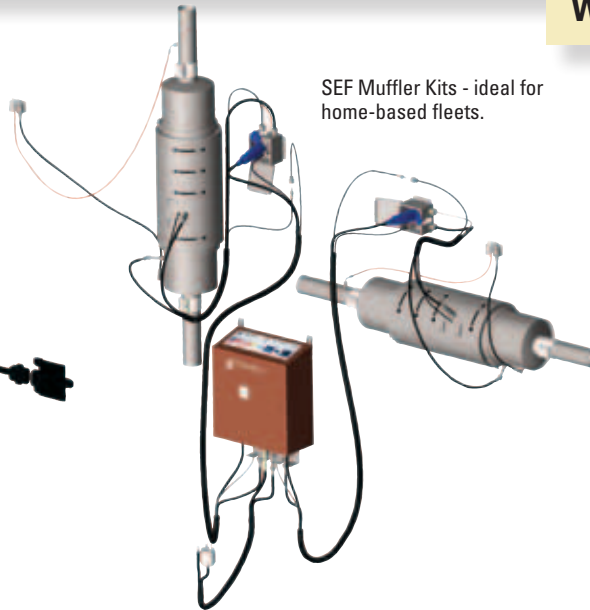

High Efficiency Filter-based Solutions

Wall Flow Technology

- >85% PM reduction
- Include Emissions Device Monitor
- 2-4 hour installation
- Fuel type: ULSD
- Sensitive to exhaust temperatures
- DPF requires ash cleaning
- CARB Level 3+ (DPF)

LNF / LXF Muffler Kits

SEF Muffler Kits - ideal for home-based fleets.

DPF Cleaning Systems

Your Local Emission Retrofit Dealer

DOCs and DOC Mufflers

Flow-through Filter Technology

- 20-30% PM reduction
- 1-3 hour installation
- Very reliable, no temperature limits
- Maintenance free
- Fuel type: any
- CARB Level 1 with Spiracle CFS

Spiracle™ Crankcase Filtration

Eliminates Crankcase Emissions

- Improves in-cab air quality
- Reduces engine oil consumption by 2-6 gal./year
- Requires routine filter change
- Results in a cleaner engine compartment
- 2-5 hour installation
- Installation kits available
